"	Philosophy of History,	. . .	<i>Lectures.</i>
Politics,	International Law,	. . .	<i>Woolsey.</i>

THIRD TERM.

Mathematics,	Astronomy,	. . .	<i>Ray.</i>
Belles Lettres,	English Literature,	. . .	<i>Shaw.</i>
Ethics,	Moral Science,	. . .	<i>Wayland.</i>

General Information.

EXPENSES.

PREPARATORY AND COLLEGIATE.

FOR FALL TERM, -	-	-	-	-	-	-	-	\$12 00
FOR WINTER TERM,	-	-	-	-	-	-	-	10 00
FOR SUMMER TERM,	-	-	-	-	-	-	-	10 00

Only one-half the above rates is required of students preparing for the Christian Ministry, and also of sons or daughters of members of Conference, and Pastors, whether active or superannuated, of all denominations.

The payment of the above rates of tuition admits the student to all the regular classes of the University, both Preparatory and Collegiate—there being no matriculation or incidental fee—thus making the expenses of the student less than at other similar institutions.

No Deductions will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from time of entrance.

TUITION REQUIRED IN ADVANCE INVARIABLY.

LOCATION.

THE ILLINOIS WESLEYAN UNIVERSITY is located in the beautiful and rapidly growing city of Bloomington, having already a population of nearly 18,000, at the junction of the "Illinois Central," the "Chicago, Alton and St. Louis," "Jacksonville and St. Louis," "Indianapolis, Bloomington and Western," and the "Lafayette, Bloomington and Mississippi Railroad"—being the center of the Railroad system of the State—in a healthful and delightful region of the country, diversified with native forests, extensive nurseries, and rolling prairies, and being one of the richest and most thickly settled agricultural districts in the United States.

Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the institution, in conjunction with the Board of Trustees, thus offering to the public strong guarantees of the high moral tone of the instructions imparted within its halls.

LIBRARY.

Valuable additions have been made during the year to the Miscellaneous and Scientific Library of the Institution.

Donations of books are solicited.

APPARATUS.

Considerable additions have lately been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing—comprising over four thousand specimens in Geology and Palæontology; two thousand five hundred Marine, and one thousand Fresh Water and Land Shells; a valuable Botanical collection, donated by Dr. GEORGE VASEY, which, with the valuable addition he has recently made, now represents nearly the entire Flora of the State; a valuable collection of the Woods of the State, embracing over seventy different specimens—also donated by Dr. VASEY; about two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. HOLDER; various specimens of Mammalogy and Herpetology; a valuable Entomological collection, prepared and presented by the late Dr. WALSH, and a fine collection of native and foreign minerals from the Smithsonian Institute of Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

In addition to the above apparatus for the illustration of Natural Science, the Museum contains many miscellaneous specimens and curiosities, among which may be mentioned a collection of more than five hundred Models, recently procured from the United States Patent Office, at Washington, which form an addition to the Museum, interesting and valuable not only as curiosities, but as illustrations of the varied application of the principles of Physics and Mechanics.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the Faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an Evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate. They will also be required to attend the regular daily worship in the College Chapel.

The "CHRISTIAN SOCIETY OF INQUIRY" sustain regular weekly prayer meetings, which are well attended, and, in connection with the religious efforts of the Churches, have resulted, under the blessing of God, in the conversion of a number of our Students.

LECTURES.

Regular courses of Lectures are delivered in connection with the recitations in the departments of Natural Science, Classics, Applied Mathematics, and of Mental and Moral Philosophy. Sabbath Lectures, suited to the time and place, are delivered in the afternoon of each Sabbath, in the College Chapel, which have been of decided profit and interest.

The Professor in charge of the Department of Law has arranged for the following course of Lectures, to be delivered to the students of the University during the Fall and Winter, at such times as may be appointed for that purpose:

BY R. E. WILLIAMS, ESQ.

1. The Theory and Necessity of Constitutional Government.

BY HON. JOHN W. SCOTT.

2. The Constitution of the United States in its general features.

BY WALTER M. HATCH, ESQ.

3. The Constitution of the United States in its Executive Department.

BY O. T. REEVES, ESQ.

4. The Constitution of the United States in its Legislative Department.

BY HON. THOMAS F. TIPTON.

5. The Constitution of the United States in its Judicial Department.

BY HON. R. M. BENJAMIN.

6. The Constitution of the State of Illinois in its general features.

BY M. A. PACKARD, ESQ.

7. The origin and history of International Law.

BY HON. LAWRENCE WELDON.

8. The general principles of International Law as now recognized.

BY HAMILTON SPENCER, ESQ.

9. Origin and history of the Common Law in its tendency to protect individuals against the power of governments.

BY J. H. ROWELL, ESQ.

10. The study of Law as a science

BY A. E. STEVENSON, ESQ.

11. The practice of Law as a profession; its duties and requirements.

It is the intention to organize a more extended Course for the next year that will approximate more nearly to the details of municipal law.

EXAMINATIONS.

There is a regular Public Examination of all the Classes at the close of each term; and Students are advanced only after such examination. No student will be advanced whose average standing falls below the minimum established by the Faculty.

TEXT BOOKS.

All the Text-Books used in the University can be obtained at reasonable rates in the city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth. We now offer to those desiring an education, *Two Courses of Study*—one Classical and one Scientific.

I.—THE REGULAR CLASSICAL COURSE, substantially the same as that of the older Colleges of the United States, including a course of four years in addition to the usual preparatory studies. The course in Latin—including the preparatory studies—extends through fifteen Terms, or five years. The course in Greek—including the preparatory studies—extends through *twelve Terms*, or four years. For the last or Junior year of Greek and Latin respectively, certain other departments of study of the Junior year may be substituted at the option of the student, provided the department chosen be completed. The completion of this course entitles the student to the degree of *Bachelor of Arts*, (A.B.)

II.—THE SCIENTIFIC COURSE, including a course in German and Latin, the completion of which entitles the student to the degree of *Bachelor of Science*, (B.S.)

The curriculum in the Scientific Department has been rearranged with special reference to the wants of the large class of students whose time, means, or other circumstances do not admit

of their pursuing the regular collegiate course. It is designed to discipline the mind and prepare those completing it for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the Greek and a part of the Latin, together with many special studies deemed desirable, and can be completed in four years.

Attention is invited to the special facilities offered for the practical study of the Natural Sciences—our course of study in that department being as *extensive* and as *thorough* as that of any similar institution in the State.

As the institution grows older, we are gradually approximating the desirable end primarily set forth in the character of a University, viz: that our students should complete the classics. The experience of ages, the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired—all are motives for the student to take a little more time, make an increased effort, and bear away from his Alma Mater its highest honors.

DEGREES.

The Degree of A. M. (*Master of Arts*) is conferred on every *Bachelor of Arts* of three years' standing, who, in the interval, has sustained a good moral character.

Application should be made personally, or by letter, at least two weeks before COMMENCEMENT. The usual fee for the Diploma is payable in advance.

NEW DEPARTMENTS.

HON. R. E. WILLIAMS, of Bloomington, a lawyer of distinguished ability, has been elected Professor of International and Constitutional Law, and will supplement the regular studies in that important department by courses of evening lectures, which can but be of the highest value to the American student and citizen.

Negotiations are now in progress looking to securing the services of an eminent physician, as Professor of Anatomy and Physiology, who will in like manner supplement the ordinary work of the recitation room by appropriate lectures, illustrated by demonstrations in human and comparative Anatomy.

The department of Vocal and Instrumental Music has been re-organized and placed under the charge of PROF. F. A. PARKER, a teacher of established reputation, and the University is thus enabled to offer advantages in musical culture equal to those offered by the best institutions in the land.

MR. C. P. MERRIMAN, an accomplished and successful teacher, has accepted the position of Instructor in the French, Spanish

and Italian languages in the University, and classes will be organized whenever desired in either or all of them.

COMPOSITION AND ELOCUTION.

Regular exercises in English Composition and Declamation are required of *all* the students of the Institution. Valuable prizes are offered to those excelling in these departments. Attention is called to the special facilities in the department of Elocution.

By reference to the Courses of Study, it will be seen that Elocution has been introduced as a part of the regular work of the First Year Preparatory and Freshman classes.

Students not members of these classes, desiring to perfect themselves in this department, can, for a very trifling expense, receive instruction regularly at any time in the course.

PREPARATORY DEPARTMENT.

The Preparatory Department, designed primarily to fit students for the College proper, is, at the same time, a well regulated Academic institution, offering all the advantages of a first-class Academy or Seminary, to those who wish a more thorough culture in the common English Branches, than can usually be obtained in our country district schools.

LITERARY SOCIETIES.

The "Belles Lettres" and "Munsellian" Literary Societies are prosecuting their labors in their peculiar field of College life and discipline with much energy and success, and were never more flourishing than during the last Academic year. The "*Belles Lettres Society*," by the most generous contributions of money and labor, have finished and furnished their hall in the new University Building in very elegant style. During the Commencement week, this commodious hall was dedicated and formally opened with interesting exercises. The "*Munsellian Society*," with equal zeal and liberality, and in a style of equal beauty, are finishing and furnishing their commodious new hall, which they expect to dedicate and occupy at the opening of the Fall Term.

These Societies have secured the nuclei of good libraries, and we earnestly appeal to a generous public in their behalf. Contributions, either in books or money, will be gratefully received and wisely applied.

ENDOWMENT, &c.

The permanent funds of the Institution, including Funded Endowments, Bonds and their Securities, Lands, Grounds, Build-

ings, Museums, Apparatus, &c , &c., may now be safely estimated at \$250,000, unincumbered by debts or liabilities of any kind.

COLLEGE BUILDINGS.

These are pleasantly located in the northern part of the city, in a beautiful Campus of ten acres of ground adorned with young forest and ornamental trees—directly on the line of the Bloomington and Normal Street Railroad—thus rendering the University easy of access from any part of the two cities.

The old University Building, though comfortable and convenient, and affording accommodations for a large number of Students, has been inadequate to meet the growing wants of our institution. A second University Building, of imposing dimensions, costing more than one hundred thousand dollars, is now nearly finished, and is already occupied.

The new building is confidently believed to be second to no similar building in the State in architectural beauty and internal convenience.

Through the beneficence of COL. W. N. COLER, of Champaign, Illinois, the magnificent new Chapel has been finished and, on the recent Commencement Sunday, was dedicated by Rev. B. I. Ives, of New York, on which occasion the friends of the University generously contributed *fourteen thousand dollars* for the further completion of the building.

This Chapel—60 by 75 feet—with galleries on three sides—beautifully frescoed and finished in oiled walnut and other native woods, and capable of accommodating 1,500 or 1,800 people—is pronounced by high authority to be the most beautiful and commodious College Chapel in the United States.

The authorities of the University having granted to COL. COLER the privilege of naming his munificent gift; at his request, the hall will be hereafter known as "AMIE CHAPEL."

BOARDING.

Good Boarding can be obtained in respectable private families, in the city, at prices ranging from \$4 to \$5 per week. Students board themselves satisfactorily, in rented rooms, at \$2 per week.

GOVERNMENT.

The laws of this institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at College exercises, careful observance of study hours, and gentlemanly deportment, are required of

every student. Visits of pleasure, gathering in groups, taking amusement on the Sabbath day—absences from rooms at improper hours, or unpermitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No student who occasions trouble in any of these particulars will be suffered to remain to exert on others his corrupting influence; but justice to our students demands that we should note the fact that such are the *esprit du corps* and high moral sentiment which prevail among them, that written laws are practically superfluous; since they will not tolerate the degrading and immoral practices which have sometimes brought disgrace upon our best colleges.

GENERAL REMARKS.

It is with peculiar pleasure that the fact is noted here that the Illinois Wesleyan University, by the complete organization of all the regular College Classes, the breadth and completeness of its Courses of Study, and the steadiness and firmness with which its Undergraduates are held to those Courses, in fact and not merely in name, has vindicated its right to the Collegiate title which it bears.

The special attention of all desiring to enter our College Classes is called to the regular Entrance Examinations at the Beginning of the Fall Term.

By a decision of the Trustees and Patronizing Conferences, ladies are now admitted to all the departments of the University. Two years of experience in this method of education have given no occasion to doubt the beneficial results and wisdom of this course.

Attention is invited to the change in the *curriculum* of Study, which challenges comparison with that of the best Colleges and Universities of the United States.

The attention of Students from abroad is called to the many advantages of Bloomington as a seat of learning. The junction of Bloomington and Normal, with a combined population of nearly 20,000—the many literary attractions of the two cities—the large museums—the facilities for studying the practical applications of science in the great manufacturing establishments located in this place—the almost continuous sessions of Courts, and the

valuable Law Library, now the most extensive in the West, thus affording unusual advantages for the study of Law, both in theory and practice—the facilities for the practical study of Anatomy and Physiology—the unusual opportunities afforded for the study of Music in all its departments—the Library, numbering 6,000 volumes, and the commodious reading rooms of the Bloomington Library Association, free to all—the regular courses of Lectures by distinguished speakers from abroad—with other advantages which an intelligent and enterprising people are constantly accumulating—all these are inducements to the Student who would supplement the work of the recitation room with a general course of reading, a higher degree of culture in the fine arts, and a practical application of the studies pursued.

The Illinois Wesleyan University being now established upon a firm and permanent financial basis, furnishes a safe investment for the donations, bequests and legacies of our friends who may wish to perpetuate their names and beneficence through future generations. Considerable amounts of money and lands have lately been secured by the *Wills* of large-hearted patrons and benefactors, but large amounts are still needed to furnish such endowments, Library, Apparatus, Museum, and other facilities as are worthy of our great Church, our great State, and the great Future of our Country. Donations for founding *Professorships*, *Free Scholarships*, *Prizes*, etc., are earnestly invited, as being worthy objects of an intelligent Christian beneficence.

Calendar for 1872-73.

Fall Term begins, . . . Tuesday, September 10th, 1872.
 Entrance Examination, 9 A. M. " " " "
 Examinations begin, . . . " December 17th, "
 Fall Term ends, . . . Thursday, " 19th, "

WINTER VACATION.

Winter Term begins, . . . Tuesday, December 31st, 1872.
 Examinations begin, . . . " March 18th, 1873.
